Projects

Library Management System | Java, Spring Boot, Thymeleaf, Hibernate, Bootstrap, MySQL

- Developed a fully automated Library Management System to replace manual record-keeping, improving efficiency and accuracy in library operations. Implemented book and user management, borrow/return tracking, and role-based access for admins and members.

Student Management System | Spring Boot, Thymeleaf, Bootstrap, Hibernate, MySQL, Java

- Developed a web-based Student Management System to manage student records with functionalities to add, view, update, and delete student information through a user-friendly interface.

House Price Prediction System | Python, R, Power BI

- Developed a House Price Prediction system using Machine Learning by performing data cleaning, feature encoding, scaling, and Exploratory Data Analysis (EDA). Trained and evaluated models like Linear Regression, Decision Tree, and Random Forest, where Random Forest achieved 99% accuracy. Created interactive visual dashboards in Power BI and built a prediction interface that gives real-time house price estimates based on user inputs.
